NJALA MATHIAS NDI

Software Engineer | AI Evaluation & Red Teaming | Web Research & Technical QA

Bamenda, Cameroon • +237 678-488-510 • mathiasnjala@gmail.com

PROFESSIONAL PROFILE

Software engineer (B.Tech) with a second degree in Philosophy, combining technical QA discipline with training in logic, argumentation, and precise writing. Two years of teaching Computer Science built the skill at the heart of strong benchmark tasks: writing clear, unambiguous questions with a single defensible answer, then diagnosing exactly where a learner's reasoning broke down. Works daily with frontier models (Claude, ChatGPT, Gemini, Perplexity) for research and prompt engineering, has hands-on data annotation and quality-review practice, and is training in AI red teaming through Microsoft's AI Red Teaming 101 series. Based in Cameroon, with working access to regional, English- and French-language records that are poorly indexed online. Detail-driven, self-directed, and happy to prove it with a trial task.

CORE COMPETENCIES

- Web & Mobile App Development
- Software Testing, Debugging & Technical QA
- AI Data Annotation, Labeling & Quality Review
- AI Model Evaluation & Red Teaming (adversarial & multi-turn prompting)
- Web Research, Fact-Checking & Source Verification
- Precision Writing & Assessment Design

TECHNICAL & PROFESSIONAL SKILLS

AI Evaluation: Prompt engineering; jailbreak, prompt-injection and multi-turn attack concepts; familiarity with OWASP Top 10 for LLMs and MITRE ATLAS

Research & Verification: Advanced search operators; cross-checking claims against primary sources; documenting exact source URLs and evidence

AI Tools: Claude, ChatGPT, Gemini, Perplexity, Lovable, Emergent; Microsoft Office & Google Workspace

Data Annotation: Labeling, review & validation of data against written guidelines

Web & App Dev: HTML, CSS, JavaScript, WordPress, Git/GitHub; working knowledge of C, C++, Python

TRAINING & CERTIFICATIONS

- AI Red Teaming 101 - Microsoft AI Red Team (in progress, 2026)
- Artificial Intelligence Career Essentials - ALX Africa (2024)
- Professional Foundations & Virtual Assistant Program - ALX Africa (2024)
- AWS Cloud Computing Program - ALX Africa (in progress)

PROFESSIONAL EXPERIENCE

Computer Science Teacher – *Saint Joseph College Mankon Bamenda* **2021- Present**

- Wrote tests and exam questions with unambiguous wording and clear marking schemes, so each question had one defensible answer.
- Taught programming and computing fundamentals, tracing student errors step by step to find where reasoning went wrong.

Parish Website - Full Design & Development - *Our Lady of Fatima Parish, Bamenda* **2026**

- Designed and built the parish's official website from the ground up as an online home for news, events, and community engagement.
- Delivered a responsive front-end in HTML, CSS, and WordPress, testing and debugging for reliable performance across devices.

Web & Mobile App Development (In Progress) - *Independent Projects* **2025 - Present**

- Building VTV Payments, a payment orchestration platform that unifies multiple payment channels into one system.
- Developing a delivery-agent app for VIVA Errand Services and a House Agent real-estate app connecting agents with clients.

Graphic Design & Print Media - *Independent Clients, incl. VIVA Errand Services* **2020 - Present**

- Designed brand packages, business cards, event programmes, flyers, and newsletters, with close attention to accuracy and consistency.

EDUCATION

Bachelor of Technology, Software Engineering - National Polytechnic University Institute, Bamenda, 2024

Higher National Diploma, Software Engineering - Kelden Bilingual Higher Institute of Professional Studies, Bamenda, 2023

Bachelor's Degree, Philosophy - Catholic University of Cameroon, Bamenda, 2021

LANGUAGES: English - Excellent • French - Fair
